Green Energy Farmer of the Year

This category is for those who are making headway with greener energy management; farmers who have taken steps to start producing energy themselves or are adopting ways to conserve energy. The judges are looking for the early pioneers in this new field and want to see evidence of reductions in the use of energy on farm or efforts to lower the carbon footprint. Farmers actively involved in producing or processing energy such as heat, fuel or electricity are ideal candidates for this category.

Complete your contact and business details on this form – and attach your achievements and plans for the following 5 areas. Then send them to Farmers Weekly at the address below.
